About me

I am a Junior Full-Stack Developer with a preference for Frontend, especially in React. I strive to create attractive and modern websites, with special attention to design. I value the importance of clean and maintainable code, constantly seeking to learn and adapt to the industry's innovations.

Experience and Projects

Open Source Development

Present

- Building a portfolio of projects that follows industry trends and practices.
- Constantly enhancing my skills, actively learning, and integrating new technologies and features into my projects.

Planorant - Premier Planner

Feb 2024 - Present

<https://planorant.com>

- Development of a Valorant team management website application.
- CRUD operations for teams, weeks, members, invitation codes, live chat, and a list of online users, with Google Auth0 for authentication.
- React, Node.js, Express.js, Socket.IO, TailwindCSS, MongoDB.
- Deployed with 50+ registered users. Repository.

FullStack Developer

Dec 2023 - Jan 2024

The Bridge & Several Energy SL

- Development of the Back (Node, Express) and Front (React) for a web application for an energy consulting firm.
- Collaboration with UX/UI, Marketing, Data Science, and DevOps teams.
- Agile methodology and collaboration using Git and Figma.
- Participation in client meetings and presentation of results.
- Upon successfully completing the project at Several Energy SL, I received an offer to join the team as a full-stack developer in a permanent position. The offer was declined due to location incompatibility.**

Internet Safety Evaluator

Jan 2020 - Dec 2023

Telus Inc.

- Websites and online content evaluation, quality control, optimization of Google's search engine.
